## DATA WEIGHTING

- For each poll, a nationally representative sample is selected in proportion to population distribution from an online panel.
- Data is rim-weighted to a matrix of geo-demographic variables. Weighting targets are sourced from various locations, including Census 2010 updated to mid-year population estimates, British Election Study and the National Readership Survey.
- Recall of 2017 vote. Any poll that includes the vote intentions suite of questions is weighted back to the actual 2017 result, making allowance for non-voting, don't know and refusal.
- Recall of 2016 EU referendum vote. Any poll that includes the vote intention suite of questions is also weighted back to the actual 2016 result, making allowance for non-voting, don't know and refusal.
- Political Interest. Any poll that includes the vote intention suite of questions is weighted to high, medium and low strength in line with the latest British Election Survey data.

## OTHER RELEVANT ISSUES

- The computer tables show the actual question wording used for each question, in the order in which they were asked, and all response options.
- Base sizes are shown on each table. All questions are based on all respondents unless otherwise stated.
- Further enquiries should be sent to [info@deltapoll.co.uk](mailto:info@deltapoll.co.uk)
- Deltapoll abides by the Market Research Society Code of Conduct, and by the British Polling Council rules, <http://www.britishpollingcouncil.org/>
- All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that they lie within 2 points.
